

HYDRANT HOOKUP REQUEST

Date of Request: _____

Service Location: _____

Hydrant Location: _____

Lake Chelan Reclamation District must comply with the provisions of WAC 248-54-820 Cross Connections. All hydrant assemblies must have an approved backflow prevention device to be installed and used by all customers.

Only LCRD employees are allowed to connect and disconnect hydrant meter assemblies. If the assembly needs to be relocated during the course of the project, a \$100 "change out" fee will be charged to your final bill each time the assembly is moved. LCRD will not rent hydrant meter assemblies during freezing weather. If water is necessary, customer must call the office that very same day so we can disconnect it to prevent freezing damage. A daily "change out" fee will occur.

Unauthorized use will be subject to criminal water theft laws and will result in the denial of any future hydrant assembly use and rentals.

The following fees will apply: \$100 hook up fee, plus \$8.00 daily rental, plus \$4.29 per 100 cubic feet. The undersigned has read and acknowledged the above and assumes all responsibilities for renting a hydrant assembly from LCRD. If damage occurs to the assembly, the undersigned agrees to pay for all time and materials to replace and/or fix hydrant assembly, and will be billed upon completion.
